## INTERESTS

Blind Source Separation (BSS) | Radio-Frequency Integrated Circuits (RFIC) | Wireless Systems and Multiplexing Schemes | Signal Processing and Machine Learning in RF/Wireless/Acoustics | Interference Management and Frequency Planning.

## EDUCATION

- The University of Illinois (UIUC)**, Urbana-Champaign, IL, USA Aug 2018-  
▪ **Ph.D.** in Electrical and Computer Engineering (Advisors: Jin Zhou, Romit R. Choudhury)  
• Focus: Blind Source Separation Algorithms, Programmable RF Receiver/Front-ends, Interference Cancellation
- The University of Michigan**, Ann Arbor, MI, USA (CGPA:3.893/4.000) Sep 2016 – Jun 2018  
▪ **M.S.** in Electrical and Computer Engineering (Advisors: Ehsan Afshari, David Blaauw)  
• Focus: Autonomous Beam Alignment, Injection-locked Coupled Oscillators, RF Power Receiver
- Tokyo Institute of Technology (Tokyo Tech)**, Tokyo, Japan (CGPA:94.3/100) Apr 2011 – Aug 2013,  
Sep 2015 – Mar 2016  
▪ **B.Eng.** in Electrical and Computer Engineering (Summa Cum laude) (Advisors: Makoto Ando, Jiro Hirokawa)  
• Early Graduation With Excellence (3-year Graduation)  
• Korean Mandatory Military Service (2013 - 2015)

## RESEARCH EXPERIENCE

- Quantum Research Intern**, IBM Thomas J. Watson Research Center May 2022 – Aug 2022  
(Mentor: Sudipto Chakraborty)  
▪ Sub-System optimization and permutation algorithm on next-generation quantum state controller.  
▪ Explored the applicability of various wireless communication techniques on quantum computing applications.
- Systems and Networking Research Group (SyNRG)**, UIUC Jun 2020 –  
(Advisors: Prof. Romit Roy Choudhury and Prof. Jin Zhou)  
▪ Under-determined blind source separation and localization using context-aware rotational motion and spatial-aliasing. [8]  
▪ Multi-modal learning-based BSS based on optimal array geometry searching via MDP and pre-trained angular space.
- Wireless Microsystems and Circuits Lab (WiMAC Lab)**, UIUC Aug 2018 –  
(Advisor: Prof. Jin Zhou)  
▪ Novel interference-tolerant receiver architecture for 5G & software-defined radios. [1, 4, 5, 6]  
• Impedance aliasing phenomenon: analysis & derivation on harmonically-coupled feedback process in time-varying N-path mixers loaded with general LTI systems.  
• By avoiding impedance aliasing, a hybrid CMOS-acoustic design for widely-tunable blocker-tolerant RF bandpass filtering Rx front-end is proposed to substantially reduce acoustic filter count. (TSMC65nm)  
▪ Fully-integrated full-duplex/FDD receiver with self-adaptive self-interference cancellation. [2]  
• Analysis and simulation of various gradient-descent algorithms for self-interference cancellation in software-modelled QAM transceiver with RF and analog hybrid-analog-digital autonomous adaptation loops.  
▪ Sub-Nyquist wideband spectrum sensing system using acoustic comb filters. [3]  
• Sparse recovery algorithm for detection of densely-occupied bands across a wide spectrum sampled below Nyquist rate.  
▪ CADELAC(Commutated-Circuit-and-Acoustic-Delay-Line-based Adaptive Canceller) - QIF2021 Finalist  
• Explored DNN-based weight initialization for direct-RF adaptive interference cancellation scheme in full-duplex wireless systems to overcome non-idealities from frequency-translational acoustic delay lines.
- Research-oriented Course Projects**, UIUC Aug 2018 –  
▪ DNN Receiver: Replaced existing QAM receiver and decoder with deep neural network-based Rx (ECE598NS)  
▪ Indoor localization using WLS algorithm for multiple voice assistants with MIC arrays (CS434)  
▪ Graph-based spectral clustering and probabilistic K-Medoid for soft-labeled image clustering (CS545)
- Radiation Laboratory (RadLab)**, U Michigan Aug 2017 – Aug 2018  
(Advisor: Prof. Ehsan Afshari)  
▪ A 77-GHz retro-directive transceiver with injection-locked coupled oscillators for self-aligning and self-steering beams to provide robust links among wireless nodes. (ST130nm)  
▪ Analysis on human language efficiency as information code with entropy of English, Japanese, Korean, and Mandarin as a communication system by proposing M-PSK equivalent high-order Markov Chain.
- Michigan Integrated Circuit Laboratory (MICL)**, U Michigan Dec 2016 – Aug 2017  
(Advisor: Prof. David Blaauw)  
▪ Multi-band RF harvester using a hybrid RF-DC & DC-DC converter adaptively controlled by VCO for optimal power delivery point. And analyzed power conversion efficiency of amplifier-first RF harvester. (TSMC180nm)

- Quadrupled beamforming antenna element number from 32x32 to 64x64 by suppressing structural distortions via supportive bridge configurations using diffusion-bonding half-etching technique. (simulated and measured)

## HONORS & AWARDS

- Finalist team of Qualcomm Innovation Fellowship Award (QIF) - Team CADELAC 2021
- Recipient of PhD Student Sponsorship Initiative by IEEE RFIC/IMS 2019 at Boston 2019
- Recipient of Kwanjeong Educational Foundation Scholarship (17th) 2018– 2022
- Recipient of U Michigan ECE Departmental Fellowship for 3 semesters 2016– 2017
- Selected as a representative of Tokyo Tech, Academic Excellence Award upon graduation. 2016
- 3-Year Graduation with Excellence at Tokyo Tech 2016  
(One of the very few achieved cases in Tokyo Tech history.)
- Recipient of Korea-Japan Joint Government Scholarship (11th). 2010 – 2016

## PROFESSIONAL AFFILIATIONS & ACTIVITIES

- Teaching Assistantship (TA) @ UIUC:
  - Communication Networks (CS438) Fall 2021
  - Radio-Frequency IC design (ECE498JZ), Electronic Circuits (ECE342) Fall/Spring 2020
- President of UIUC Korean ECE student association. Fall 2021
- Vice president of University of Michigan Korean EECS student association. [\[Link\]](#) 2016 – 2017
- Co-organizer of the 1st ASPIRE League E-Olympics at KAIST, South Korea. [\[Link\]](#) Aug 2014
- Director and Editor of a Youtube video clip of 180K views of Tokyo Tech [\[Link\]](#) Feb 2013
- President of Tokyo Tech International Student Association (TISA) [\[Link\]](#) Feb 2012 – Jul 2013

## KEY COURSES

### UIUC

- Random Process | Statistical Learning Theory | MDPs and Reinforcement Learning
- Mobile Computing | Adv. Wireless Networks & Sensing | Detection and Estimation Theory
- Machine Learning (ML) | ML for Signal Processing | Deep Learning in Hardware
- Advanced Analog IC Design | Radio-Frequency IC & System Design | Advanced Signal Integrity

### U Michigan

- Analog/Digital Interfaces | Analog IC Design | VLSI Design I
- Adv. Electromagnetic Theory | Microwave Circuits | Digital Communication & Coding

## LANGUAGE & SKILLS

### Language

- Korean(Native), English(Fluent), Japanese(Bilingual), Chinese(Beginner)

**Programming**

- Python, MATLAB, C++, L<sup>A</sup>T<sub>E</sub>X, CSS/HTML

**Framework**

- PyTorch, TensorFlow, Scipy, scikit-learn, SciKit(DSP, Comm), CVXPY, OpenCV, Qiskit

**Tools/Equipment**

- Cadence Virtuoso, HFSS, ADS, PCB Design tools, VNA, Signal/Spectral Analyzer
